

"ARCHITECTURE SHOULD BE A MIRROR OF LIFE AND TIME."
WALTER GROPIUS

PROGRAM DIAGRAM

NORTH ELEVATION

SUSTAINABLE FEATURES

EAST ELEVATION

GREEN ROOF GARDEN
Natural extension of the adjacent city park

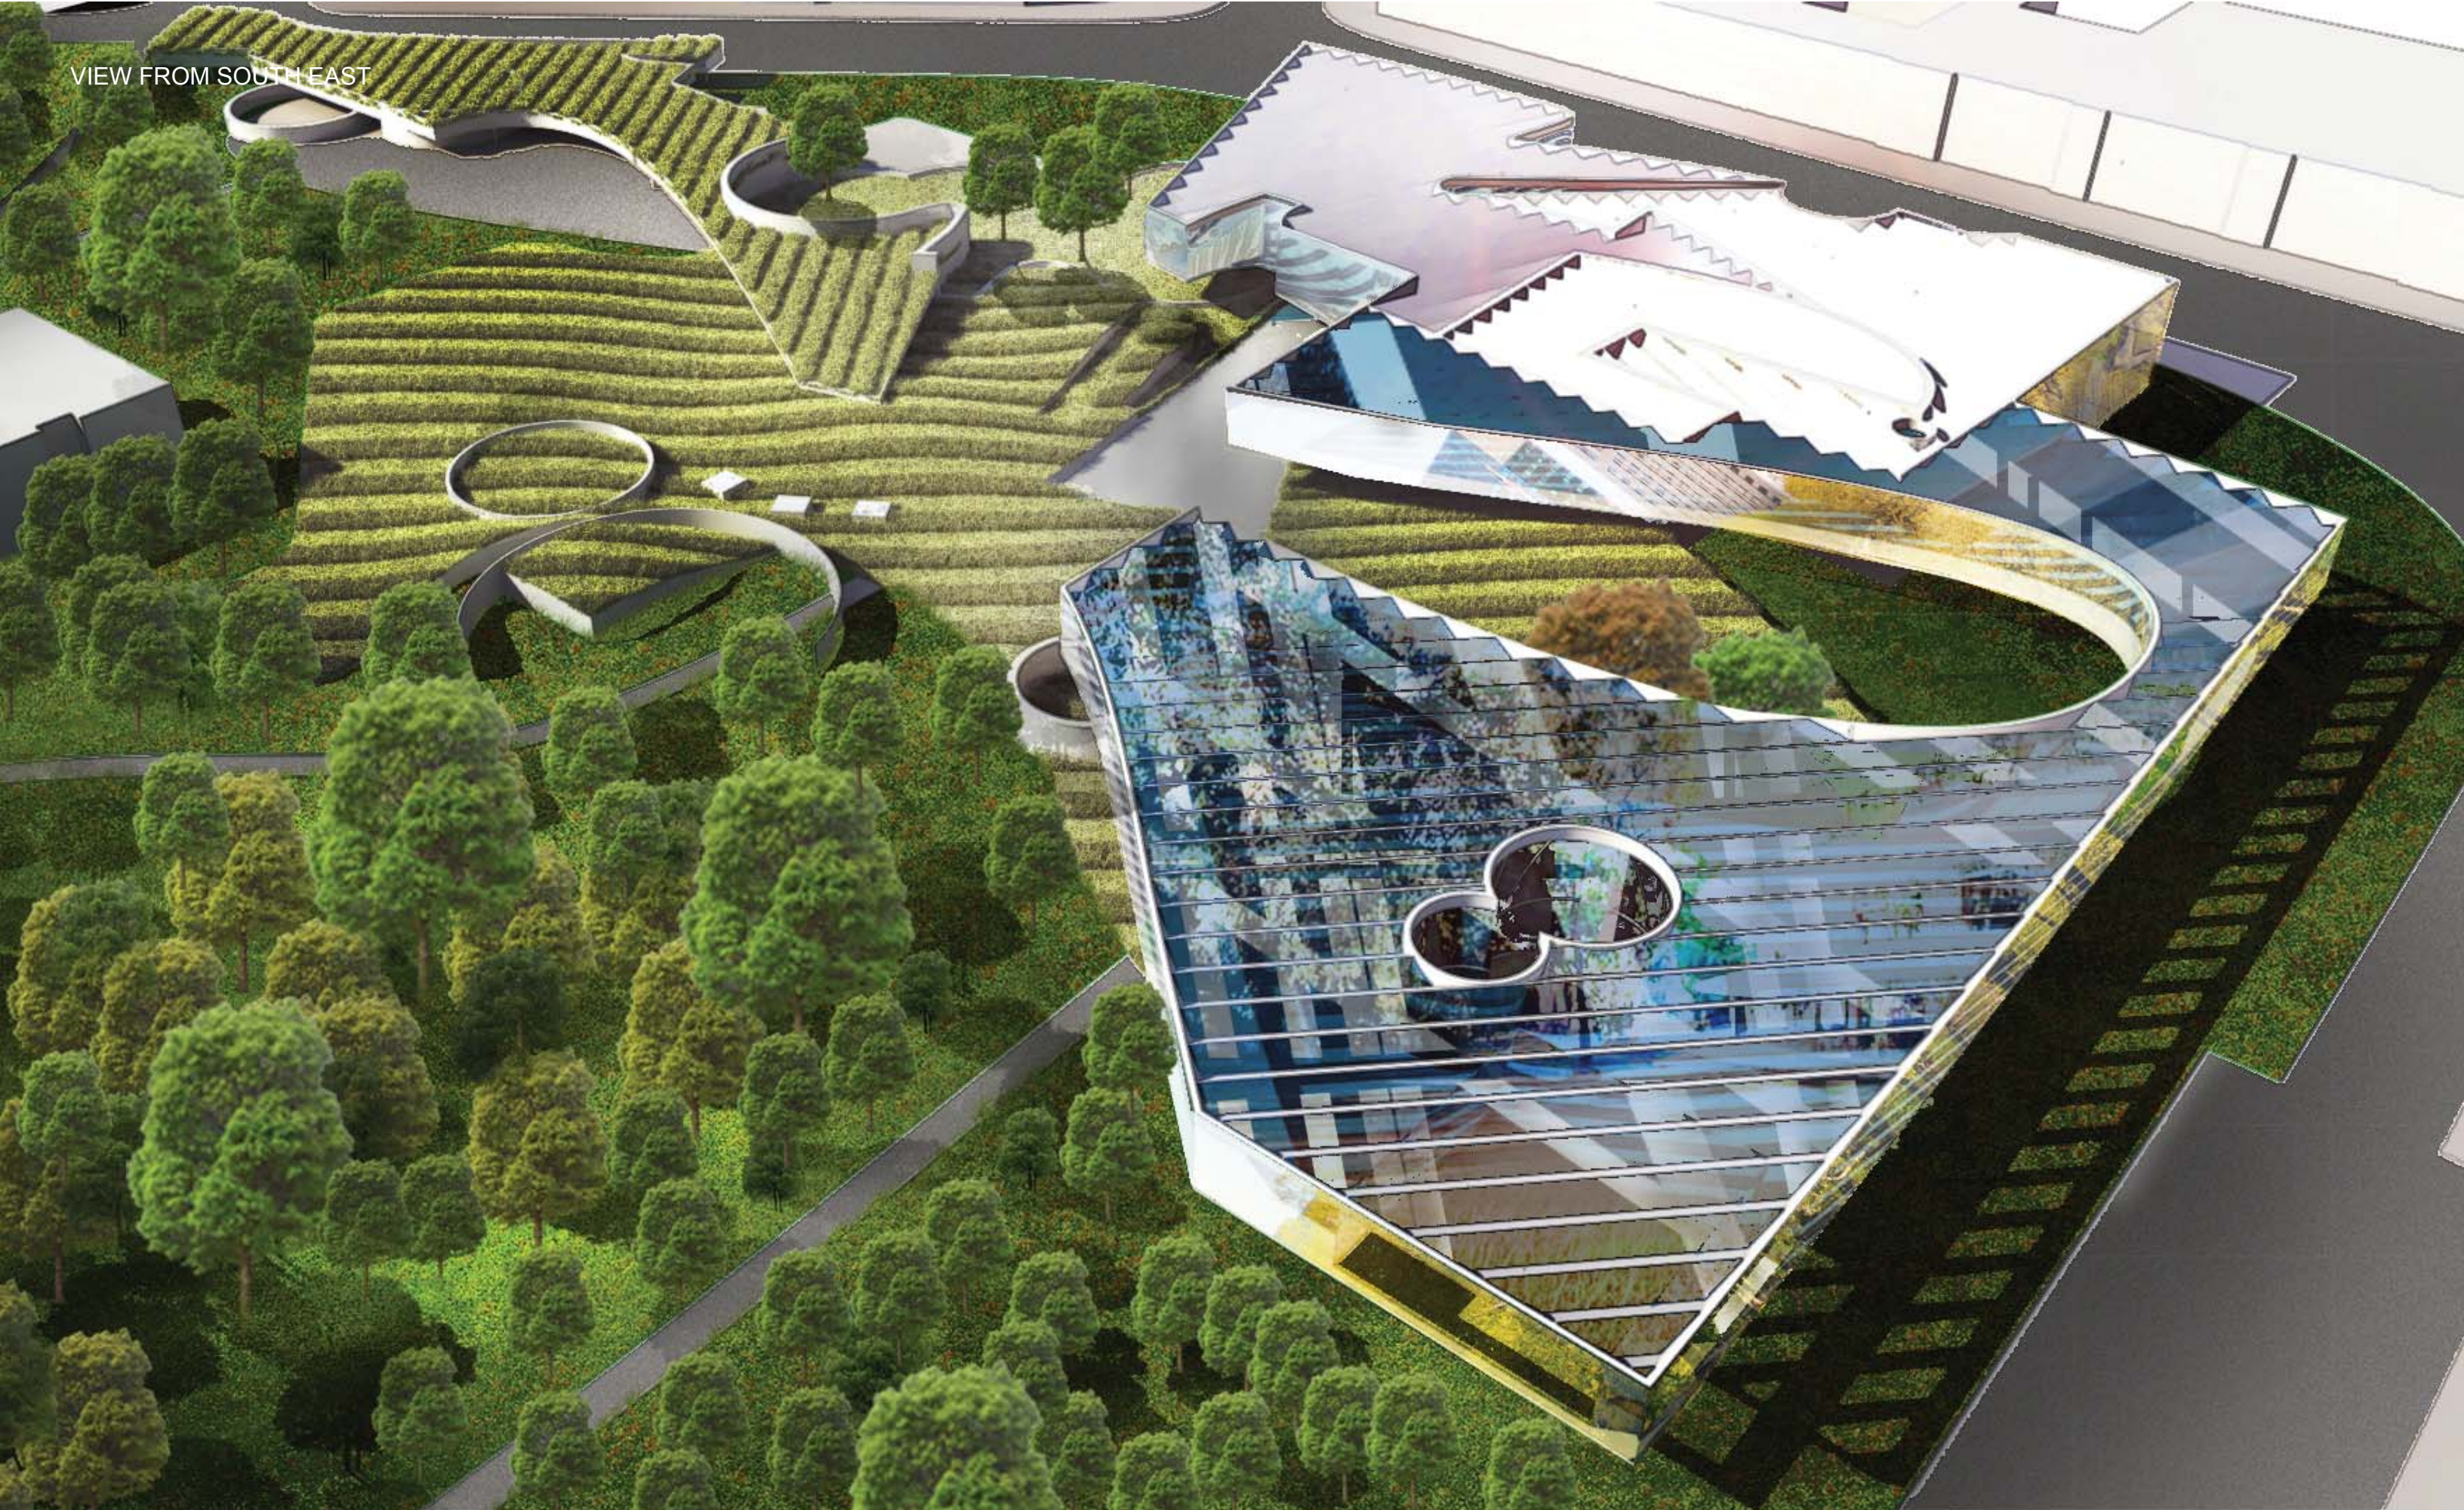

BUILDING INTEGRATED PHOTOVOLTAIC SYSTEM
Skylights' glass encapsulates thin-film solar modules, allowing incident daylight to shine through, yet preventing thermal overheating from a direct sunlight. The photovoltaic's output covers the electrical power needs for the exhibition spaces

OFFICE / AMENITIES + RESTAURANT, CAFE, STORE
Natural ventilation via inlet and exhaust air louver dampers integrated into glass curtain wall

GALLERIES / EXHIBITION SPACE
Geothermal self-regulating cooling system integrated into floor

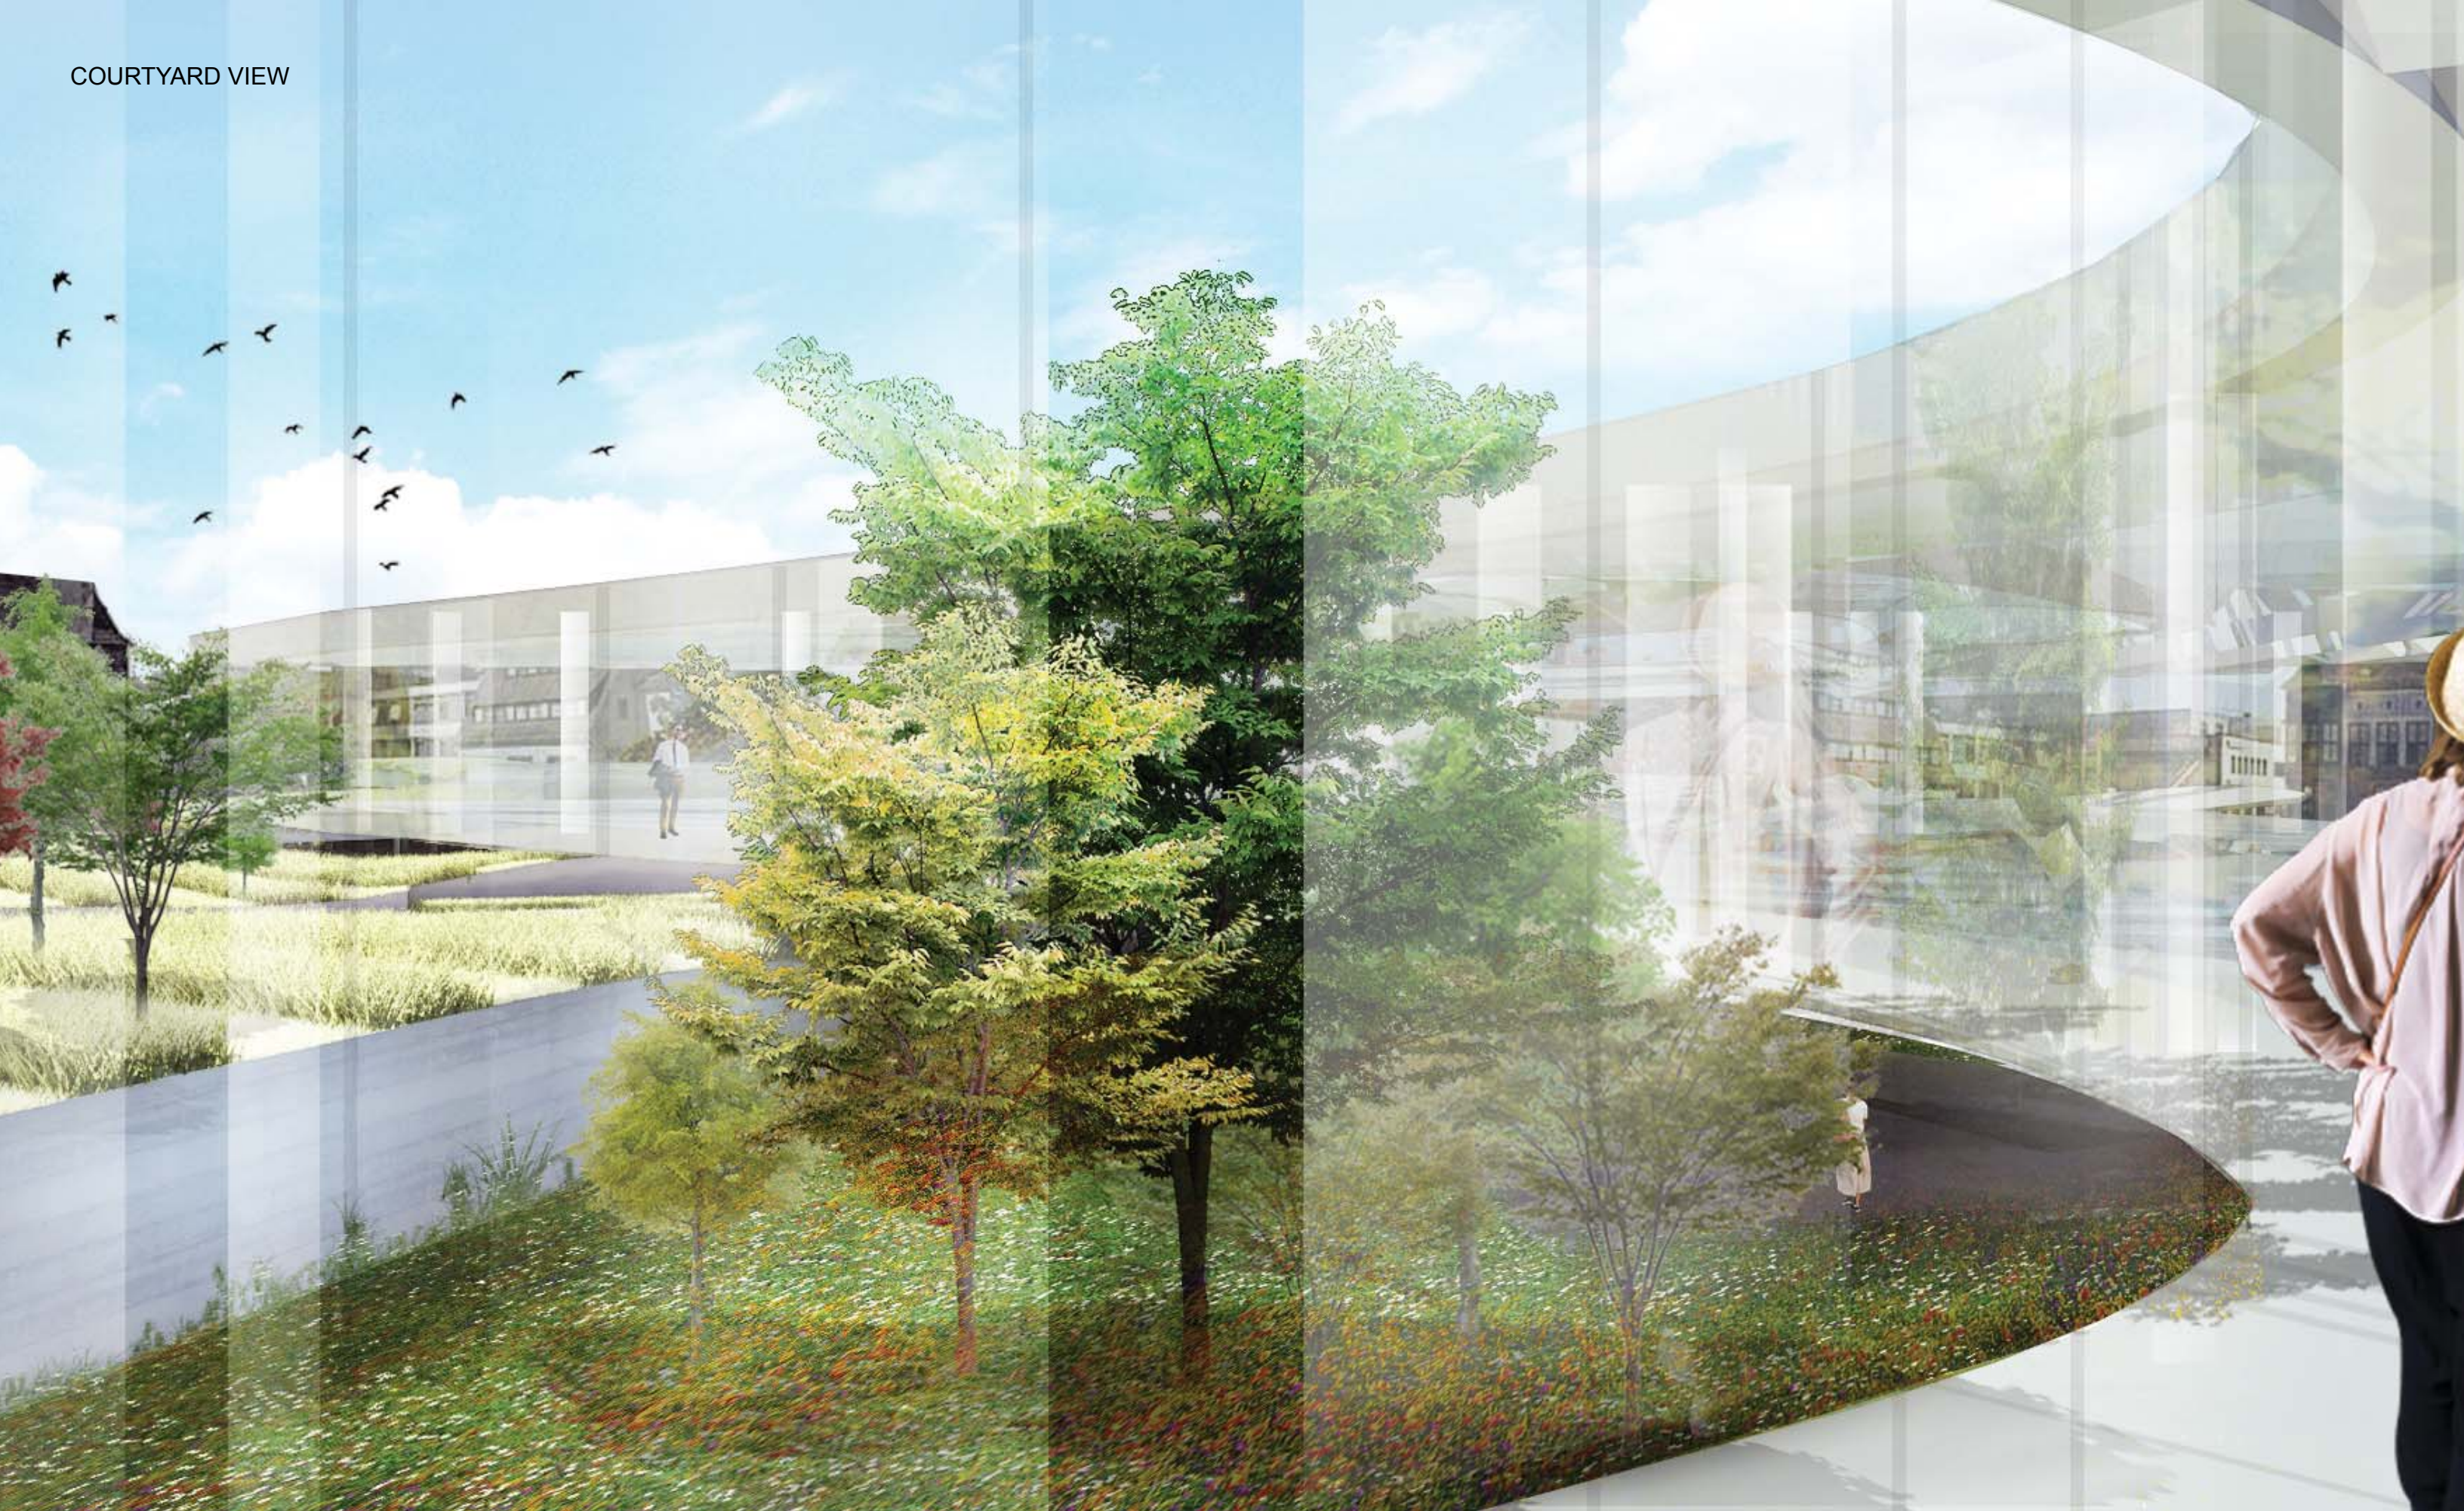

VIEW FROM SOUTH EAST

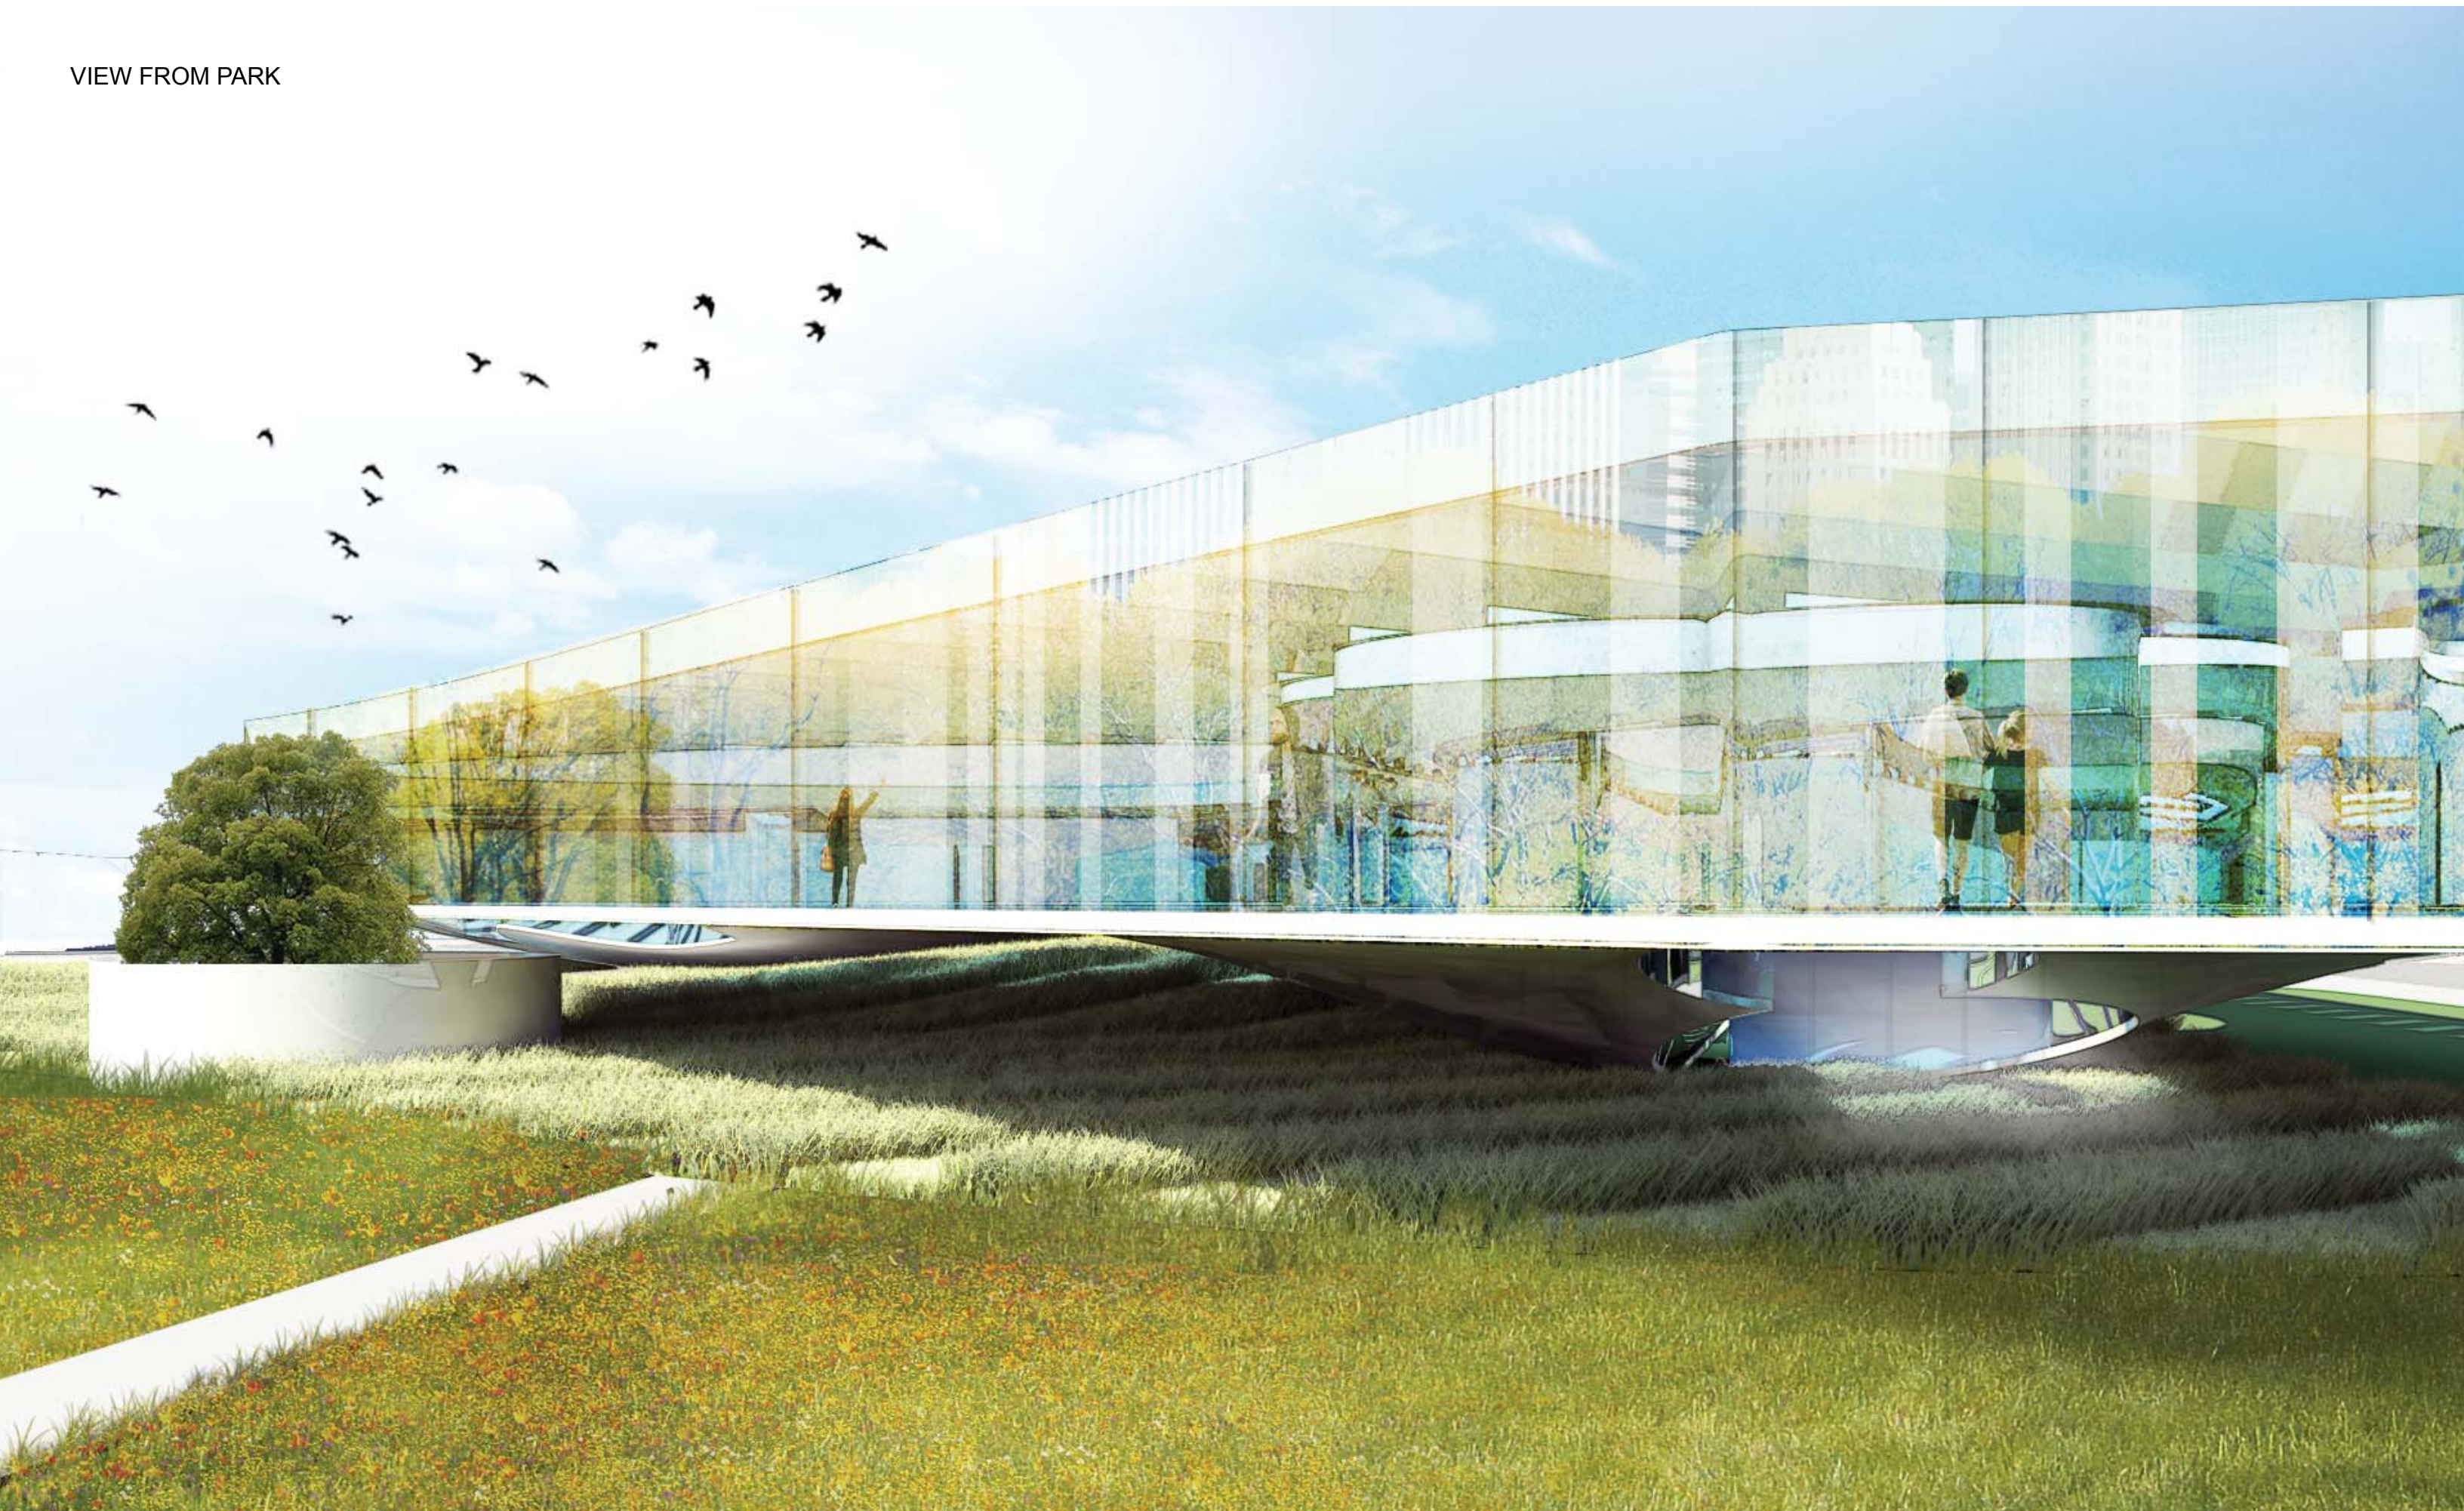

EXTERIOR PARK VIEW
